SUMMARY

Full-Stack Software Engineer with 4+ years of experience turning business requirements into scalable, production-ready software that supports business operations, automation, and growth. I specialize in SaaS platforms, CRM systems, AI-powered applications, automation, and modern web solutions, combining software architecture, hands-on development, cloud infrastructure, and product thinking.

Through ByteForce and subsequent engineering roles, I have delivered 20+ software projects and managed 30+ production websites for organizations including ProcheDeMoi, YourSmile, YourSoft Run, and Cocoinbox. My work includes multi-tenant platforms, CRM and clinical systems, AI automation, e-commerce, payment integrations, and production infrastructure, using React, Next.js, TypeScript, Node.js, GraphQL, MongoDB, WordPress, WooCommerce, PHP, Vercel, OVHcloud, and Cloudflare.

I focus on measurable delivery: shipping production systems, automating business workflows, supporting multiple client environments, and turning complex requirements into maintainable software that teams can rely on.

SKILLS

Frontend: React.js · Next.js · TypeScript · JavaScript · Tailwind CSS · shadcn/ui · HTML · CSS

Backend: Node.js · GraphQL · Apollo · REST APIs · MongoDB · Mongoose · Firebase · Authentication · API Architecture

Architecture & Infrastructure: SaaS Architecture · Multi-tenant Systems · Cloud Deployment · Vercel · Cloudflare · VPS · DNS · SSL · Performance Optimization · Redis · Git

CMS & E-commerce: WordPress · WooCommerce · Elementor · PHP · Custom WordPress Plugins · Payment Integrations

AI & Automation: AI-powered SaaS · LLM integrations · AI agents · MCP · Email automation · AI content generation · AI data processing

Product: Software Architecture · UI/UX · Technical Specifications · Product Strategy · Client Management · Project Estimation · Team Coordination

WORK EXPERIENCE

Full-Stack Software Engineer / Software Developer

ProcheDeMoi — France · Remote

Mar 2026 – Present

Working on prochedemoi.fr and booking.prochedemoi.fr, a local search and AI-oriented data platform focused on businesses, services and places across France.

- Headless CMS architecture with Next.js, TypeScript and Strapi.
- Develop and maintain the ProcheDeMoi platform using Next.js, TypeScript and modern web technologies.
- Build local business discovery experiences for restaurants, shops, services and other businesses.
- Develop structured AI-oriented datasets and endpoints for machine-readable business information.
- Implement SEO-focused technical architecture, structured data and AI-readable content.
- Work on multilingual content and local search experiences.
- Develop APIs and data infrastructure designed for search engines and AI systems.
- Optimize performance, technical SEO, indexing and content discoverability.

Full-Stack Developer / CMS & Infrastructure Engineer

YourSoft Run — France · Remote

Aug 2025 – Mar 2026

Managed and maintained a large portfolio of production WordPress websites and OVHcloud hosting environments for French businesses, combining WordPress development, infrastructure management, third-party integrations, headless CMS architecture and custom software development.

- Managed 30+ OVHcloud shared hosting environments, supporting portfolios containing 5+ websites per hosting environment.
- Administered and maintained a large fleet of production WordPress websites, ensuring availability, performance and

operational continuity.

- Developed custom WordPress plugins on demand, adapting functionality to specific business requirements and client workflows.
- Built and maintained integrations with Stripe for payment and e-commerce workflows.
- Implemented Power BI integrations to connect business data with reporting and dashboarding workflows.
- Worked with headless CMS architectures, integrating content management systems with modern frontend applications and APIs.
- Diagnosed and resolved complex WordPress, WooCommerce, Elementor, PHP and plugin compatibility issues in production environments.
- Managed OVHcloud hosting, DNS, SSL certificates, FTP, databases and email configurations, including migrations and troubleshooting.
- Managed domain and DNS configurations, including Cloudflare, DNS records and SSL/TLS configuration.
- Optimized WordPress environments through caching, PHP configuration, memory allocation, execution limits and server-side performance tuning.
- Worked with PHP, MySQL/phpMyAdmin, Apache, PHP-FPM and WordPress internals to troubleshoot issues beyond the WordPress administration interface.
- Built and maintained custom WooCommerce functionality, including checkout modifications, payment integrations and business-specific features.
- Investigated and resolved conflicts between WordPress core, themes, plugins and third-party integrations.
- Managed website migrations between hosting providers and configured production environments for reliable deployment.
- Provided ongoing technical support and maintenance across multiple production websites simultaneously.
- Worked directly with clients to understand technical requirements, diagnose technical issues and deliver tailored solutions.

Full-Stack Software Engineer / Software Developer

YourSmile Run — Morocco

Jan 2025 – July 2025

Worked on the YourSmile platform, a specialized orthodontic CRM and clinical management solution.

- Designed and developed full-stack features for a multi-role orthodontic CRM platform.
- Built workflows for administrators, super-admins, dentists and back-office users.
- Developed GraphQL APIs with Node.js, MongoDB and Mongoose.
- Implemented authentication, permissions and role-based access control.
- Worked on orthodontic treatment workflows and structured dental data management.
- Integrated STL 3D model visualization and clinical data workflows.
- Developed responsive interfaces using Next.js, React, TypeScript, Tailwind CSS and shadcn/ui.
- Participated in architecture, debugging, deployment and continuous product improvements.

Software Engineer / Full-Stack Developer

Cocoinbox — Canada · Remote

Jan 2024 – Dec 2024

Worked remotely on the Cocoinbox platform and CRM, contributing to the development of business software and AI-powered communication workflows.

- Developed and maintained the Cocoinbox SaaS platform and CRM using modern full-stack technologies.
- Worked on secure email, notes and file workflows with an emphasis on privacy and controlled data handling.
- Developed backend and frontend features using Next.js, Node.js, GraphQL and MongoDB.
- Implemented encrypted API communication and authentication/session workflows.
- Worked on AI-powered features including email summaries, reply generation, trust scoring and audio-to-email workflows.
- Integrated external services for communication, email and business automation.
- Contributed to product architecture, technical decisions, debugging, deployment and ongoing improvements.

Full-Stack Software Developer

ByteForce SARL · Casablanca, Morocco

2022 – Jan 2024

Founded and lead ByteForce, a Moroccan software development company focused on custom web and mobile applications, SaaS products and digital solutions.

- Designed and delivered 20+ web and software projects for clients across different industries.
- Worked directly with clients from requirements and product definition through architecture, development, deployment

and maintenance.

- Designed scalable architectures using Next.js, React, TypeScript, Node.js, GraphQL and MongoDB.
- Led UI/UX decisions and transformed business requirements into production-ready interfaces and workflows.
- Managed deployments and infrastructure involving Vercel, VPS environments, Cloudflare, DNS and SSL.
- Developed custom WordPress and WooCommerce solutions, including plugins, integrations and performance optimization.
- Managed technical estimation, project pricing, architecture decisions, development planning and client communication.

TECHNICAL PROJECTS

SaaS & AI Platforms: Designed and developed SaaS concepts combining business software with AI automation, including AI email management, AI agents, automated content generation, lead generation and MCP-based integrations.

CRM & AI Workforce Architecture: Designed a multi-tenant CRM architecture where each company operates its own database and seats can be occupied by human employees or AI agents performing tasks such as SEO content creation and lead generation.

WordPress & WooCommerce: Developed and maintained business websites and e-commerce platforms, including custom PHP plugins, WooCommerce customization, payment integrations, Elementor solutions and hosting migrations and headless CMS.

Infrastructure & DevOps: Hands-on experience managing production environments, Vercel deployments, VPS servers, Cloudflare DNS and security, SSL, OVH, AWS, GCP, PHP-FPM, OPcache, WordPress hosting and performance optimization.

EDUCATION

Master's Degree — Computer Science, Computer Engineering

Heriot-Watt University · United Kingdom

Sep 2025 – May 2027 · 1 yr 8 mos

Advanced studies in computer science, computer engineering, software engineering and emerging technologies.

- Advanced coursework in computational theory and software engineering.
- Practical work involving data mining, machine learning and artificial intelligence.
- Research-oriented projects addressing complex technological challenges.
